I am a sustainability engineer with over two years experience implementing sustainability in the context of the transport, infrastructure and buildings sectors. I have produced Life Cycle Assessments (LCAs), Greenhouse Gas Assessments, Water and Energy Modelling using a variety of tools to inform clients of their environmental impact and identify key opportunities to improve the sustainability goals of the project.

I have a developed understanding of how to consider climate resilience and resource efficiency from a strategic and project level, and have worked with stakeholders to enhance the resilience of projects and improve resource efficiency through design and management procedures. As an engineer, a team member and a leader, I am engaged in making social change, with a focus on promoting diversity, inclusion, accessibility and equity.

Qualifications and Affiliations

University of New South Wales

BACHELOR OF ENGINEERING (CIVIL ENGINEERING WITH ARCHITECTURE) (CLASS 1 HONOURS) 2018-2021

Thesis: A Systematic Review of the Contribution of Vertical Greenery Systems to Indoor Wellbeing

- GREEN STAR ACCREDITED PROFESSIONAL 2023
- INFRASTRUCTURE SUSTAINABILITY ACCREDITED PROFESSION 2023

Experience

WSP Australia

SUSTAINABILITY GRADUATE 2022-PRESENT

- Integrated climate resilience, energy efficiency, water, materials and user amenity into the design, construction and operation of X buildings, X infrastructure projects and X precincts.
- Provided sustainable design services for the Green Star and Infrastructure Sustainability Ratings across project; six Green Star Ratings and three IS Ratings for circa ~\$2 billion of works.
- Advised throughout the development of X sustainability strategies for program delivery.

Department of Defence (Capital Facilities and Infrastructure Branch)

ASSISTANT PROJECT OFFICER 2020-2021

- Administered contracts for 5 CFI projects totalling a value of \$1.3 billion dollars across Sydney and Darwin throughout development and delivery for PM/CA, Design Services and Main Contractors.
- Participated in the procurement of PM/CA and design services, learning defence methods and priorities.
- Identified inaccuracies and irregularities in project documentation through updating outdated financial ledgers to resolve misrepresented funding.
- Expanded CFI's lessons learnt database regarding procurement methodologies, project performance, observations and suggestions to optimise efficiency and reduce repeated errors.
