Sydney (George St), Australia

QUALIFICATIONS AND AFFILIATIONS

Bachelor of Engineering (Honours Class 1), Civil Engineering with Architecture, University of New South Wales, 2022

Green Star Accredited Professional (Buildings)

Young Engineers Australia Sydney – Committee (2021- 2023)

PROFILE

Christopher holds a Bachelor of Engineering (Honours Class 1) majoring in Civil Engineering with Architecture from the University of New South Wales. He is a sustainability consultant that is passionate about contributing to the continual improvement and innovations in the built environment.

He has developed a client centric approach to the planning and delivery of capital infrastructure projects from performing as an assistant project officer at the Department of Defence on projects totalling \$1.3B..

PROFESSIONAL EXPERIENCE

BaptistCare Vertical Village and Macquarie Park Master Plan

Christopher supported the development for the ESD Concept Design Report for the SSDA submissions for both the Vertical Village and Masterplan for BaptistCare. He also helped deliver the BASIX strategy and NatHERS works for the Vertical Village.

Green Star Performance Recertification, Charter Hall

Christopher delivered Charter Hall's Green Star Performance FY22 recertification for their Retail and Industrial portfolios involving over 270 assets. Chris had a leading role in managing the energy and water performance aspects of the portfolios.

Low Carbon Precinct Study, Inner West Council

Christopher supported the development of the Low Carbon Precinct Study. This study looked to create an evidence base to develop innovative planning controls to support low carbon precincts.

Ivanhoe Estate B3, Frasers Property

Christopher delivered the BASIX Strategy and NatHERS results for the property. This was paired with further analysis on the energy, water and thermal comfort of the residential structure.

Mayfield Gardens Master Plan

Christopher reviewed current and proposed site infrastructure to support the development of a sustainability strategy based off the site's potential. This strategy revolved largely on the water and other ecological opportunities of the site to facilitate decision making in the master plan.

Ausgrid GRESB Infrastructure Assessment, IFM Investors

Christopher has supported Ausgrid's GRESB Infrastructure Assessment annually since their inaugural submission in FY22 which involved developing internal procedure for data collection, materiality assessments, gap analyses, submission compilation and mock scoring across the GRESB assessment indicators. Chris took a leading role in managing the submission since FY22.

PROFESSIONAL HISTORY

**Department of Defence, Assistant Project Officer
Capital Facilities and Infrastructure**

2020 - 2022
