

Christopher Wang

SUSTAINABILITY CONSULTANT, SYDNEY

+61 426 081 029 | cywang2910@gmail.com | [linkedin.com/in/chriswang0](https://www.linkedin.com/in/chriswang0)

- Experienced sustainability consultant, integrating strategy, policy, and design to drive sustainable practices and operations within the built environment.
 - Successfully delivered impactful outcomes across a wide range of clients and projects, including utility energy entities, retail portfolios, industrial and logistic portfolios, mixed-use residential developments, residential precincts, and transport infrastructure.
 - Collaborative and skilled in engaging multidisciplinary teams to ensure sustainability is embedded throughout the project lifecycle.
-

Qualifications and Affiliations

- Bachelor of Engineering (Honours Class 1), Civil Engineering with Architecture, University of New South Wales
 - Green Star Accredited Professional
 - Engineers Australia - Young Engineers Australia Sydney Committee
-

Professional History

Consultant, Sustainability and Climate Change Advisory, WSP

2022-Present

Promoted to Design Consultant in Q3 2023

- Provided assurance services aligned with ISO 15064-3 guidance to prominent Australian real estate investment trusts, assessing their GHG, energy, and water data for their Sustainability Reporting and GRESB Survey.
 - Managed sustainability data for Australian investment and funds management company, overseeing energy usage, GHG emissions, water consumption, and waste management.
 - Coordinated the annual GRESB Infrastructure Assessment for a major electricity distribution network since their inaugural FY21 submission on behalf of a global infrastructure investment manager. Developed internal procedures for data collection, stakeholder engagement, mock scoring, and submission compilation, resulting in a notable 35% improvement in FY22.
 - Delivered the Green Star Performance recertification process of Retail and Industrial portfolios for leading property investment and funds management companies since FY22, encompassing more than 300 assets. Elevating the (50+ asset) Retail Portfolio of one client from a two to three-star rating for the first time.
 - Developed ESD, BASIX, and NatHERS strategies and design guidance for various residential and aged care assets through conducting building physics analysis, including thermal comfort, energy, water, and facade assessments.
 - Authored life cycle assessments for 5 high rises (commercial, residential, and mixed-use) in QLD and VIC, coordinating with clients to conceptualise and model environmental impact improvements in materials and construction practices.
 - Conducted policy reviews and modelled building performance to support Inner West Council on multiple studies, providing valuable insights and recommendations for new buildings' energy and water targets, as well as development incentives.
-

Assistant Project Officer, Capital Facilities and Infrastructure, Dept. of Defence

2020-2022

- Administered contracts totalling \$1.3 billion across 5 CFI projects in Sydney and Darwin. Oversaw PM/CA, design services, and main contractors throughout development and delivery.
 - Participated in procurement activities for PM/CA and design services.
-

Extracurricular Activities

- Engineers Australia Young Engineers Australia Sydney Committee Member (2022-23) – Developed and delivered a calendar of events including moderating sustainability panels and representing EA at functions, universities and external events.
- President of the UNSW Civil and Environmental Engineering Society (2020-21) – Created strategy for one of the largest university clubs (2000+ active members), leading a team of 57 to deliver 50+ events. Established 3 new portfolios to ensure future focus development; 'HR' to optimise team operations; 'Diversity & Inclusion' to heighten social impact; and 'Programs' to provide mentoring opportunities.
- UNSW Illuminate Product Manager (2018-20) – coordinated designs of audio-visual displays such as UNSW's submission for VIVID Sydney, an interactive station for Starlight Foundation at Sydney Children's Hospital, and various on-campus displays.
