PROFILE

Christopher is a sustainability consultant with experience integrating strategy, research, policy, and data analytics to drive sustainable practices across sectors. Christopher has successfully delivered GHG emission baselines, building and organisational decarbonisation pathways, and provided sustainability assurance for emissions data across a wide range of clients and projects, including public utilities, retail, varied property portfolios, residential precincts, and government.

Prior to WSP, he has developed a client centric approach to the planning and delivery of capital infrastructure projects as an assistant project officer at the Department of Defence on projects totalling over \$1.3B.

PROFESSIONAL EXPERIENCE

WSP in Australia

Design Consultant – Sustainability and Climate Change Advisory

OCT 2023 - PRESENT

- ▶ Prepared the annual GRESB Infrastructure Assessment for a major electricity distribution network since their inaugural FY21 submission, enhancing data collection, stakeholder engagement, mock scoring, and submission processes, resulting in a notable 35% relative improvement in FY22 compared to FY21.
- ▶ Delivered the first GHG Emissions Baseline calculation and report for a major water provider across scope 1, 2 and 3 emissions aligned with the GHG Protocol, analysing operational performance data and financial data, determining the standard profile, drought-year profile, as well as 5-year future forecasting.
- ▶ Synthesised a Water sustainability assessment for a leading Australian property manager, conducting data analysis and crafting a comprehensive report that identified data gaps, highlights risks and recommended 30+ measures to set the foundation of a wholistic water sustainability management strategy.
- ▶ Co-developed Emissions Accounting Guidelines for all NSW State government entities to follow as part of emerging mandatory emissions reporting requirements, including a review of local and international policies, standards and frameworks (including GHG protocol and IFRS S2) and stakeholder engagement to deliver a practical approach.
- ▶ Conducted life cycle assessments for high-rise developments and transport infrastructure, researching best practices and innovative products, calculating potential carbon reductions, and communicating findings and procurement implications to developers, engineers, architects, and builders.
- ▶ Developed python scripts automating data downloads and material linking for LCAs which save approximately 4 hours of work per study.

Consultant – Sustainability

FEB 2022 - OCT 2023

- ▶ Coordinated and reviewed the Green Star Performance submissions of over 400 property assets, identifying and preparing evidence, and developing improvement strategies that uplifted a 50+ asset Retail Portfolio from a two to three-star rating.
- ▶ Delivered ISO 15064-3 aligned assurance services for Australian REITs sustainability data, ensuring accuracy for reporting and GRESB submissions while providing management reports recommending improvements in governance, quality, and their processes for collecting and preparing data.
- ▶ Prepared sustainability data for Australian REITs, using Excel and Envizi, overseeing energy usage, GHG emissions, water consumption, and waste management metrics for sustainability reporting.

Department of Defence

Assistant Project Officer, Capital Facilities and Infrastructure

MAR 2020 – FEB 2022

- ▶ Administered contracts totalling \$1.3 billion for 5 CFI projects in Sydney and Darwin across project management, design services, and main contractors throughout development and delivery.
- ▶ Supported the coordination of project deliverables, timelines, and stakeholder communications to ensure seamless project execution.

QUALIFICATIONS AND AFFILIATIONS

- ▶ Bachelor of Engineering (Honours Class 1), Civil Engineering with Architecture, University of New South Wales
- ▶ Green Star Accredited Professional
