Consolidated Sustainability and Climate Data as well as progress against our Sustainability Roadmap

Important notice

This FY25 Sustainability Data Book (Data Book) has been prepared for the purpose of providing APA stakeholders with information regarding our approach to sustainability and climate issues related to our business. It has not been prepared as financial, investment or other advice or to provide any guidance in relation to the future position or performance of APA.

This publication contains forward-looking information, including about APA Group, its financial results and other matters, which are subject to risk factors. 'Forward-looking statements' may include indications of, and guidance on, future earnings and financial position and performance, statements regarding APA Group's future strategies and capital expenditure, statements regarding estimates of future demand and consumption, and statements regarding APA's sustainability and climate transition plans and strategies, the impact of climate change and other sustainability issues for APA, energy transition scenarios, actions of third parties, and external enablers such as technology development and commercialisation, policy support, market support and energy and offsets availability.

Forward-looking statements can generally be identified by the use of forward-looking words such as, 'expect', 'anticipate', 'likely', 'intend', 'could', 'may', 'predict', 'plan', 'propose', 'will', 'believe', 'forecast', 'estimate', 'target', 'outlook', 'guidance', 'goal', 'ambition' and other similar expressions and include, but are not limited to, forecast EBIT and EBITDA, free cash flow, operating cash flow, distribution guidance and estimated asset life. Some of these expressions are intended to identify forward-looking statements that discuss future expectations concerning sustainability, including climate change and energy transition scenarios and outcomes.

At the date of this report, APA Group believes there are reasonable grounds for these forward-looking statements and we have used due care and attention in preparing this report. Forward-looking statements, opinions and estimates are not guarantees or predictions of future performance and involve known and unknown risks and uncertainties and other factors.

Many of these are beyond our control and may involve significant elements of subjective judgement and assumptions about future events, which may or may not be correct. There can be no assurance that actual outcomes will not materially differ from these forward-looking statements, opinions and estimates. A number of important factors could cause actual results or performance to differ materially from such forward-looking statements, opinions and estimates.

These factors include, but are not limited to, general economic conditions; exchange rates; technological changes; the geopolitical environment; the extent, nature and location of physical impacts of climate change; changes associated with the energy market transition; and government and regulatory intervention, including to limit the impacts of climate change or manage the impact of Australia's transitioning energy system.

In respect of the scenario analysis disclosed, there are also inherent limitations with this analysis. It is difficult to predict which, if any, of the scenarios might eventuate. Scenarios do not constitute definitive outcomes or probabilities, and scenario analysis relies on assumptions that may or may not be, or prove to be, correct and may or may not eventuate. Scenarios may also be impacted by additional factors to the assumptions disclosed. Due to the inherent uncertainties and limitations associated with measuring greenhouse gas emissions data, our references to the same are estimates and APA Group Limited does not guarantee the accuracy of the information provided and readers should not place undue reliance on these estimates. The basis for calculation of the emissions data is provided in APA's FY25 Greenhouse Gas Emissions and Energy Calculation Methodology. Investors should carefully consider and form their own views as to these matters and any assumptions.

No representation or warranty is made regarding the accuracy, completeness or reliability of the forward-looking statements or opinions contained in this Data Book or the assumptions on which either is based. Investors should carefully consider and form their own views in relation to these matters and any assumptions on which any forward-looking statements, estimates or opinions are based.

Except as required by applicable laws or regulations, we do not undertake to publicly update or revise any forward-looking statements (or the assumptions on which they are based) to reflect any change in expectations, contingencies or assumptions, whether as a result of new information or future events.

To the maximum extent permitted by law, APA and its officers do not accept any responsibility or liability (howsoever arising, including due to negligence, default or lack of care) for any loss, damage, cost, expense or outgoing of any kind suffered or incurred by any person arising from the receipt, interpretation or use of the information contained in, or inferred from, this report and do not represent, warrant or guarantee the success or performance of the matters stated in this report.

Any opinions expressed in the report are based on the knowledge and expertise of the persons forming the opinion at the date the opinion was formed and may in the future cease to be (and may never have been) appropriate in light of subsequent knowledge or attitude.

Reporting framework alignment

This Data Book provides an index of APA's alignment with the reporting standards of the Task Force on Climate-related Financial Disclosures (TCFD), Sustainability Accounting Standards Board (SASB) and Global Reporting Initiative (GRI). This Data Book provides an index of APA's alignment with the reporting standards of the Sustainability Accounting Standards Board (SASB), Global Reporting Initiative (GRI) and the Task Force on Climate-related Financial Disclosures (TCFD).

For additional information about APA's FY25 climate-related performance, see APA's FY25 Annual Report, APA's Climate Report 2025 (within the Annual Report) and APA's Climate Transition Plan 2025.

Sustainability Accounting Standards Board Index

SASB sector	Code	Accounting metric	APA response / reference FY25
GOVERNANCE			
Extractives & Minerals Processing Sector - Oil & Gas (Midstream)	EM-MD-520a.1	Total amount of monetary losses as a result of legal proceedings associated with federal pipeline and storage regulations	APA Annual Report 2025 - Environment APA FY25 Sustainability Data Book - (Infrastructure & Business Intelligence) Note: Metric scope expanded beyond original SASB Sub Sector(s) assets to reflect all APA asset types and regulatory compliance landscape (inc. environment, health and safety)
Infrastructure - Gas Utilities & Distributors	IF-GU-540a.1 EM-MD-540a.1	Number of reportable pipeline incidents, percentage significant	Metric partially disclosed APA FY25 Sustainability Data Book - (Environment) Note: Metric scope expanded beyond original SASB Sub Sector(s) assets to reflect all APA asset types and regulatory compliance landscape (inc. environment, health and safety)
Extractives & Minerals Processing Sector - Oil & Gas (Midstream)			
Infrastructure - Electric Utilities & Power Generators	IF-EU-140a.2	Number of incidents of non-compliance associated with water quantity and/or quality permits, standards, and regulations	Metric partially disclosed APA FY25 Sustainability Data Book - (Environment) & (Infrastructure & Business Intelligence) Note: Metric scope expanded beyond original SASB Sub Sector(s) assets to reflect all APA asset types and regulatory compliance landscape (inc. environment, health and safety)
Infrastructure - Electric Utilities & Power Generators	IF-EU-550a.1	Number of incidents of non-compliance with physical and/or cybersecurity standards or regulations	Metric partially disclosed APA FY25 Sustainability Data Book - (Infrastructure & Business Intelligence)
INFRASTRUCTURE			
Extractives & Minerals Processing Sector - Oil & Gas (Midstream)	IF-GU-000.B EM-MD-000.A	Amount (total) of natural gas delivered to: (1) residential customers (2) commercial customers (3) industrial customers (4) transferred to a third party	Metric partially disclosed APA FY25 Sustainability Data Book - (Infrastructure & Business Intelligence)
Infrastructure - Gas Utilities & Distributors	IF-GU-000.C	Length of gas: (1) transmission (2) distribution pipelines	APA Annual Report 2025 - About APA
Extractives & Minerals Processing Sector - Oil & Gas (Midstream)	EM-MD-540a.2 IF-GU-540a.3	Percentage of natural gas pipelines inspected	Metric partially disclosed APA FY25 Sustainability Data Book - (Infrastructure & Business Intelligence) Note: Metric scope expanded beyond original SASB Sub Sector(s) assets to reflect all APA asset types and regulatory compliance landscape (inc. environment, health and safety)
Infrastructure - Gas Utilities & Distributors			
Infrastructure - Electric Utilities & Power Generators	IF-EU-000.B	Total electricity delivered to: (1) residential (2) commercial (3) industrial, (4) all other retail customers (5) wholesale customers	Metric partially disclosed APA FY25 Sustainability Data Book - (Infrastructure & Business Intelligence) Note: Metric scope expanded beyond original SASB Sub Sector(s) assets to reflect all APA asset types and regulatory compliance landscape (inc. environment, health and safety)
Infrastructure - Electric Utilities & Power Generators	IF-EU-000.C	Length of transmission and distribution lines	APA Annual Report 2025 - About APA
Infrastructure - Electric Utilities & Power Generators	IF-EU-000.D	Total electricity generated, % by major energy source, % in regulated markets	APA FY25 Sustainability Data Book - (Infrastructure & Business Intelligence) Note: Metric scope expanded beyond original SASB Sub Sector(s) assets to reflect all APA asset types and regulatory compliance landscape (inc. environment, health and safety)
Infrastructure - Electric Utilities & Power Generators	IF-EU-000.E	Total wholesale electricity purchased	Metric not disclosed
Renewable Resources & Alternative Energy - Solar Technology & Project Developers	RR-ST-000.B	Total capacity of completed solar energy systems	APA FY25 Sustainability Data Book - (Infrastructure & Business Intelligence) Note: Metric scope expanded beyond original SASB Sub Sector(s) assets to reflect all APA asset types and regulatory compliance landscape (inc. environment, health and safety)
GREENHOUSE GAS (GHG) EMISSIONS			
Extractives & Minerals Processing Sector - Oil & Gas (Midstream)	EM-MD-110a.1 IF-EU-110a.1	Gross global Scope 1 emissions, percentage covered under: (1) emissions- limiting regulations, and (2) emissions- reporting regulation	APA Climate Transition Plan 2025 APA FY25 Sustainability Data Book - Climate Note: Metric scope expanded beyond original SASB Sub Sector(s) assets to reflect all APA asset types and regulatory compliance landscape (inc. environment, health and safety)
Infrastructure - Electric Utilities & Power Generators			

Infrastructure – Electric Utilities & Power Generators	IF-EU-110a.2	Greenhouse gas (GHG) emissions associated with power deliveries	APA Climate Transition Plan 2025 APA FY25 Sustainability Data Book – Climate Note: Metric scope expanded beyond original SASB Sub-Sector(s) assets to reflect all APA asset types and regulatory compliance landscape.
Extractives & Minerals Processing Sector – Oil & Gas (Midstream)	EM-MD-110a.2 IF-EU-110a.3	Discussion of long-term and short-term strategy or plan to manage Scope 1 emissions, emissions reduction targets, and an analysis of performance against those targets	APA Climate Transition Plan 2025 APA Annual Report 2025 – Climate Report Note: Metric scope expanded beyond original SASB Sub Sector(s) assets to reflect all APA asset types and regulatory compliance landscape (inc. environment, health and safety) Note: Metric scope expanded beyond original SASB Sub-Sector(s) assets to reflect all APA asset types and regulatory compliance landscape.
Infrastructure – Electric Utilities & Power Generators			
ENERGY			
Renewable Resources & Alternative Energy – Solar Technology & Project Developers	RR-ST-130a.1	(1) Total energy consumed (2) percentage grid electricity (3) percentage renewable	APA Climate Transition Plan 2025 APA FY25 Sustainability Data Book – Climate Note: Metric scope expanded beyond original SASB Sub Sector(s) assets to reflect all APA asset types and regulatory compliance landscape (inc. environment, health and safety)
SOCIETY			
Extractives & Minerals Processing Sector – Oil & Gas (Midstream)	EM-MD-540a.4	Discussion of management systems used to integrate a culture of safety and emergency preparedness throughout the value chain and throughout project lifecycles	APA Annual Report 2025 – Infrastructure & Business Intelligence Note: Metric scope expanded beyond original SASB Sub Sector(s) assets to reflect management systems that apply to total APA asset portfolio.
Infrastructure – Electric Utilities & Power Generators	IF-EU-320a.1 RR-WT-320a.1	(1) Total recordable incident rate (TRIR) (2) fatality rate (3) near miss frequency rate (NMFR)	Metric partially disclosed APA Annual Report 2025 – People APA FY25 Sustainability Data Book – (People) Note: Metric scope expanded beyond original SASB Sub Sector(s) assets to reflect safety statistics that apply to the total APA asset portfolio.
Renewable Resources & Alternative Energy – Wind Technology & Project Developers			
Infrastructure – Gas Utilities & Distributors	IF-GU-540a.4	Description of efforts to manage the integrity of gas delivery infrastructure, including risks related to safety and emissions	APA Annual Report 2025 – Infrastructure & Business Intelligence APA Annual Report 2025 – Risks and Opportunities Note: Metric scope expanded beyond original SASB Sub Sector(s) assets to reflect infrastructure process safety and integrity efforts across total APA asset portfolio.
VALUE CHAIN			
Infrastructure – Electric Utilities & Power Generators; Gas Utilities & Distributors	IF-EU-000.A IF-GU-000.A	Number of customers served: (1) residential (2) commercial (3) industrial	Metric partially disclosed APA Annual Report 2025 – Our Customers & Partners APA FY25 Sustainability Data Book – (Customers & Partners) Note: Metric has been allocated by APA division customers (excluding customers of assets currently under construction by the Infrastructure Development division).
ENVIRONMENT			
Extractives & Minerals Processing Sector – Oil & Gas (Midstream)	EM-MD-160a.1	Description of environmental management policies and practices for active operations	Metric partially disclosed APA Annual Report 2025 – Environment Note: Metric scope expanded beyond original SASB Sub Sector(s) assets to reflect total APA asset portfolio.
Extractives & Minerals Processing Sector – Oil & Gas (Midstream)	EM-MD-160a.4 & RR-ST-150a.2	Number and aggregate quantity of reportable spills, quantity recovered	Metric partially disclosed APA FY25 Sustainability Data Book – (Environment) Note: Metric scope expanded beyond original SASB Sub Sector(s) assets to reflect reportable spill incidents on total APA asset portfolio. Omission: spills in Artic not relevant to APA business (EM-MD-160a.4 measure)
Renewable Resources & Alternative Energy – Solar Technology & Project Developers			
Extractives & Minerals Processing Sector – Oil & Gas (Midstream)	EM-MD-160a.2	Percentage of land owned, leased, and/or operated within areas of protected conservation status or endangered species habitat	Metric not disclosed
Extractives & Minerals Processing Sector – Oil & Gas (Midstream)	EM-MD-160a.3	Terrestrial acreage disturbed, percentage of impacted area restored	Metric not disclosed

Infrastructure – Electric Utilities & Power Generators	IF-EU-140a.3 RR-ST-140a.2	Description of water management risks and discussion of strategies and practices to mitigate those risks	Metric not disclosed
Renewable Resources & Alternative Energy – Solar Technology & Project Developers			
Infrastructure – Electric Utilities & Power Generators	IF-EU-140a.1	(1) Total water withdrawn (2) Total water consumed percentage of each in regions with High or Extremely High Baseline Water Stress	Metric partially disclosed APA FY25 Sustainability Data Book – (Environment)
Renewable Resources & Alternative Energy – Solar Technology & Project Developers	RR-ST-150a.1	Amount of hazardous waste generated, percentage recycled	Metric partially disclosed APA FY25 Sustainability Data Book – (Environment) Note: Original SASB Sub Sector(s) metric scopes have been aggregated to reflect total APA asset portfolio than specific energy asset-types.
AIR EMISSIONS			
Infrastructure – Electric Utilities & Power Generators	IF-EU-120a.1 EM-MD-120a.1	Air emissions of the following pollutants: (1) NOx (excluding N2O), (2) SOx, (3) particulate matter (PM10), (4) lead (Pb), and (5) mercury (Hg)	APA FY25 Sustainability Data Book – (Environment) Note: Original SASB Sub Sector(s) metric scopes have been aggregated to reflect total APA asset portfolio than specific energy asset-types.
Extractives & Minerals Processing Sector – Oil & Gas (Midstream)			

Global Reporting Initiative (GRI) standards index

GRI topic	Code	Disclosure	APA response / reference
GENERAL AND MANAGEMENT			
GRI 2: GENERAL DISCLOSURES (2021)			
1	The Organisation and its reporting practices		
	2-1	Organisational Details 2-1 Organisational details The organisation shall: a. report its legal name; b. report its nature of ownership and legal form; c. report the location of its headquarters; d. report its countries of operation.	APA Annual Report 2025 a-d. APA Annual Report 2025 Head Office: Level 25, 580 George Street, Sydney NSW 2000 Australia
	2-2	Entities included in the organization's sustainability reporting 2-2 Entities included in the organization's sustainability reporting The organization shall: a. list all its entities included in its sustainability reporting; b. if the organization has audited consolidated financial statements or financial information filed on public record, specify the differences between the list of entities included in its financial reporting and the list included in its sustainability reporting; c. if the organization consists of multiple entities, explain the approach used for consolidating the information, including: i. whether the approach involves adjustments to information for minority interests; ii. how the approach takes into account mergers, acquisitions, and disposal of entities or parts of entities; iii. whether and how the approach differs across the disclosures in this Standard and across material topics.	APA Group (APA) comprises two registered investment schemes, APA Infrastructure Trust, and APA Investment Trust and their controlled entities b-c APA Annual Report 2025
	2-26	Mechanisms for seeking advice and raising concerns 2-26 Mechanisms for seeking advice and raising concerns The organization shall: a. describe the mechanisms for individuals to: i. seek advice on implementing the organization's policies and practices for responsible business conduct; ii. raise concerns about the organization's business conduct.	APA Annual Report 2025 - Ethics and Integrity, Reports & Incidents, People (Psychosocial risk protocol) APA Code of Conduct Whistleblower Policy
	2-27	Compliance with laws and regulations 2-27 Compliance with laws and regulations The organization shall: a. report the total number of significant instances of non-compliance with laws and regulations during the reporting period, and a breakdown of this total by: i. instances for which fines were incurred; ii. instances for which non-monetary sanctions were incurred; b. report the total number and the monetary value of fines for instances of noncompliance with laws and regulations that were paid during the reporting period, and a breakdown of this total by: i. fines for instances of non-compliance with laws and regulations that occurred in the current reporting period; ii. fines for instances of non-compliance with laws and regulations that occurred in previous reporting periods; c. describe the significant instances of non-compliance; d. describe how it has determined significant instances of non-compliance.	a-c. APA Annual Report 2025 - Reports & Incidents APA Annual Report 2025 (Environmental Compliance) APA FY25 Sustainability Data Book (Environment) d. Sustainability Data Book - Basis of Preparation
	2-28	Membership Associations 2-28 Membership associations The organization shall: a. report industry associations, other membership associations, and national or international advocacy organizations in which it participates in a significant role.	APA Annual Report 2025 - Governance - Membership of associations, Partnering with government and industry to facilitate the energy transition. APA FY25 Sustainability Data Book (Customers & Partners)
5	Stakeholder engagement		
	2-29	Approach to stakeholder engagement 2-29 Approach to stakeholder engagement The organization shall: a. describe its approach to engaging with stakeholders, including: i. the categories of stakeholders it engages with, and how they are identified; ii. the purpose of the stakeholder engagement; iii. how the organization seeks to ensure meaningful engagement with stakeholders.	APA Annual Report 2025 - Performance - Social Licence, First Nations Peoples.
	2-30	Collective Bargaining agreements 2-30 Collective bargaining agreements The organization shall: a. report the percentage of total employees covered by collective bargaining agreements; b. for employees not covered by collective bargaining agreements, report whether the organization determines their working conditions and terms of employment based on collective bargaining agreements that cover its other employees or based on collective bargaining agreements from other organizations.	APA Annual Report 2025 - People APA FY25 Sustainability Data Book - (People)

GRI 3: MATERIAL TOPICS (2021)

3-1	Process to determine Material Topics a. Describe the process it has followed to determine its material topics, including: i. how it has identified actual and potential, negative and positive impacts on the economy, environment, and people, including impacts on their human rights, across its activities and business relationships; ii. how it has prioritized the impacts for reporting based on their significance; b. specify the stakeholders and experts whose views have informed the process of determining its material topics	a. In FY24, we refreshed our Sustainability Roadmap. This refresh focused on supporting APA's strategy to be the partner of choice in delivering infrastructure solutions for the energy transition and reflects the significant role sustainability plays for our business, customers, communities and investors. The refreshed Sustainability Roadmap was informed by a double materiality assessment that considered how APA impacts and is impacted by a range of sustainability topics. The materiality assessment was guided by the most recent Global Reporting Initiative methodology (GRI 3: Material Topics 2021) and involved the participation of an extensive set of internal and external stakeholders, including our securityholders, customers, community groups, landowners and employees.
		b. For further information refer to the FY2025 Annual Report, Our approach to sustainability section.
3-2	List of Material Topics a. List Material Topics b. Report changes to the list of material topics compared to the previous reporting period	a. The FY2025-2027 material topics are included within the FY2025 Sustainability Data book, Sustainability Scorecard tab. b. In FY2024 we refreshed our Sustainability Roadmap and carried out a GRI-aligned materiality assessment. The material sustainability topics identified through this assessment have changed from the FY2021 assessment, with the FY2024 list increasing from nine to ten topics, including: Work Health, safety, and wellbeing; Employee Practices; Modern slavery and responsible value chain; Nature and biodiversity; GMG emissions; Climate risk; Energy reliability and affordability; Energy transition; Local communities; First Nations engagement and partnership. The material topics are included within the FY2025 Sustainability Data book, Sustainability Scorecard tab.
3-3	Management of Material Topics a. describe the actual and potential, negative and positive impacts on the economy, environment, and people, including impacts on their human rights; b. report whether the organization is involved with the negative impacts through its activities or as a result of its business relationships, and describe the activities or business relationships; c. describe its policies or commitments regarding the material topic; d. describe actions taken to manage the topic and related impacts, including: i. actions to prevent or mitigate potential negative impacts; ii. actions to address actual negative impacts, including actions to provide for or cooperate in their remediation; iii. actions to manage actual and potential positive impacts; e. report the following information about tracking the effectiveness of the actions taken: i. processes used to track the effectiveness of the actions; ii. goals, targets, and indicators used to evaluate progress; iii. the effectiveness of the actions, including progress toward the goals and targets; iv. lessons learned and how these have been incorporated into the organization's operational policies and procedures; f. describe how engagement with stakeholders has informed the actions taken and how it has informed whether the actions have been effective	a-d Annual Report 2024 and Annual Report 2025, Section Performance - People; Environment; Social Licence. e. Tracking the effectiveness of our material topics is included in the FY25 Databook. The FY25-27 Sustainability Scorecard and associated metrics are disclosed within the FY25 Sustainability Data Book and progress reporting against the Sustainability Scorecard metrics are included from FY25. e - f. Tracking the effectiveness of our material topics is included in the FY2025 Databook. Our FY25-27 Sustainability Roadmap can be found in the FY25 Sustainability Data Book with overviews of each initiatives under each value driver in the Performance section of the Annual Report 2025.

ECONOMIC

GRI 201: ECONOMIC PERFORMANCE (2016)

201-1	Direct economic value generated and distributed	APA FY25 Sustainability Data Book - (Financials ESG)
201-2	Financial implications and other risks and opportunities due to climate change	APA Annual Report 2025 - Climate Report (Strategy, Climate change transition and risk)
		APA Climate Transition Plan 2025
201-3	Defined benefit plan obligations and other retirement plans	Metric not disclosed
201-4	Financial assistance received from government	APA FY25 Sustainability Data Book - (Financial ESG)

GRI 202: MARKET PRESCENCE (2016)

202-1	Ratios of standard entry level wage by gender compared to local minimum wage	Metric not disclosed
202-2	Proportion of senior management hired from the local community	Metric not disclosed

GRI 203: INDIRECT ECONOMIC IMPACTS (2016)

203-1	Infrastructure investments and services supported	APA Annual Report 2025
203-2	Significant indirect economic impacts	Metric not disclosed

GRI 204: PROCUREMENT PRACTICES (2016)

204-1	Proportion of spending on local suppliers	APA Modern Slavery Statement 2024
-------	---	-----------------------------------

GRI 205: ANTI-CORRUPTION (2016)

205-1	Operations assessed for risks related to corruption	APA Annual Report 2025 - Govern Ethics and Integrity
-------	---	--

GRI 206: ANTI-COMPETITIVE BEHAVIOUR 2016	205-2	Communication and training about anti-corruption policies and procedures	APA Annual Report 2025 - Governance & risk management, Ethics and Integrity
			APA Code of Conduct Anti-Bribery and Corruption Policy Whistleblower Policy
	205-3	Confirmed incidents of corruption and actions taken	APA Annual Report 2025 - Ethics and Integrity APA FY25 Sustainability Data Book - People
	206-1	Legal actions for anti-competitive behaviour, anti-trust, and monopoly practices.	Metric not disclosed
GRI 207: TAX (2019)			
	207-1	Approach to tax	APA Tax Transparency Report 2025
	207-2	Tax governance, control, and risk management.	APA Tax Transparency Report 2025
	207-3	Stakeholder engagement and management of concerns related to tax	Metric not disclosed
	207-4	Country-by-country reporting	Metric not disclosed
ENVIRONMENT			
GRI 301: MATERIALS (2016)			
	301-1	Materials used by weight or volume	Metric not disclosed
	301-2	Percentage of recycled input materials used to manufacture the organization's primary products and services.	Metric not disclosed
	301-3	Reclaimed products and their packaging materials.	Metric not disclosed
GRI 302: ENERGY (2016)			
	302-1	Energy consumption within the organisation	APA FY25 Sustainability Data Book - (Climate) - tab Energy
	302-2	Energy consumption outside of the organisation	Metric not disclosed
	302-3	Energy intensity	Metric not disclosed
	302-4	Reduction of energy consumption	Metric not disclosed
	302-5	Reductions in energy requirements of products and services	Metric not disclosed
GRI 303: WATER AND EFFLUENTS (2018)			
	303-1	A description of how the organisation interacts with water	Metric not disclosed
	303-2	Management of water discharge-related impacts	Metric not disclosed
	303-3	Water withdrawal	FY25 Sustainability Data Book - (Environment)
	303-4	Water discharge	Metric not disclosed
	303-5	Water consumption	Metric not disclosed
GRI 304: BIODIVERSITY (2016)			
	304-1	Operational sites owned, leased, managed in, or adjacent to, protected areas and areas of high biodiversity value outside protected areas	Metric not disclosed
	304-2	Significant impacts of activities, products, and services on biodiversity	Metric not disclosed
	304-3	Habitats protected or restored	Metric not disclosed
	304-4	IUCN Red List species and national conservation list species with habitats in areas affected by operations	Metric not disclosed
GRI 305: EMISSIONS (2016)			
	305-1	Direct (Scope 1) GHG emissions	FY25 Sustainability Data Book - (Climate) - tab GHG emissions
	305-2	Energy indirect (Scope 2) GHG emissions	FY25 Sustainability Data Book - (Climate) - tab GHG emissions
	305-3	Other indirect (Scope 3) GHG emissions	FY25 Sustainability Data Book - (Climate) - tab GHG emissions
	305-4	GHG emissions intensity	APA Annual report - Climate report section under Materics and Targets APA Climate Transition Plan 2025
	305-5	Reduction of GHG emissions	APA Annual report - Climate report section under Materics and Targets APA Climate Transition Plan 2025
	305-6	Emissions of ozone-depleting substances (ODS)	Metric not disclosed
	305-7	Nitrogen oxides (NOX), sulphur oxides (SOX), and other significant air emissions	APA FY25 Sustainability Data Book, tab (Environment) and GHG emissions tab
GRI 306: WASTE (2020)			
	306-1	Waste generation and significant waste-related impacts	Metric not disclosed
	306-2	Management of significant waste-related impacts	Metric not disclosed
	306-3	Waste generated	APA FY25 Sustainability Data Book - (Environment)
	306-4	Waste diverted from disposal	APA FY25 Sustainability Data Book - (Environment)
	306-5	Waste directed to disposal	APA FY25 Sustainability Data Book - (Environment)

**GRI 307:
ENVIRONMENTAL
COMPLIANCE
(2016)**

307-1 Non-compliance with environmental laws and regulations

APA Annual Report - Environment compliance
APA FY25 Sustainability Data Book - (Environment)

**GRI 308:
SUPPLIER
ENVIRONMENTAL
ASSESSMENT
(2016)**

308-1 New suppliers that were screened using environmental criteria

Metric partially disclosed.
APA Annual Report 2025 - Customers and Partners - (Supplier ESG program)

308-2 Negative environmental impacts in the supply chain and actions taken

Metric not disclosed.

SOCIETY

**GRI 401:
EMPLOYMENT
(2016)**

401-1 New employee hires and employee turnover

APA FY25 Sustainability Data Book - (People) - tab Workforce data & diversity data

401-2 Benefits provided to full-time employees

APA Website - Employee benefits

Taskforce on Climate-Related Disclosures (TCFD) index

TCFD recommended disclosures

TCFD recommended disclosure	TCFD disclosure guidance for all sectors			APA response / reference
GOVERNANCE Disclose the organisation's governance around climate-related risks and opportunities.	a. Describe the board's oversight of climate-related risks and opportunities.	Guidance for all sectors	In describing the board's oversight of climate-related issues, organisations should consider including a discussion of the following: – processes and frequency by which the board and/or board committees (e.g., audit, risk, or other committees) are informed about climate-related issues;	APA Climate Transition Plan 2025 – "Governance" section APA Annual Report 2025 – "Climate Report – Climate-related governance" section APA Corporate Governance Statement 2025
			In describing the board's oversight of climate-related issues, organisations should consider including a discussion of the following: – whether the board and/or board committees consider climate-related issues when reviewing and guiding strategy, major plans of action, risk management policies, annual budgets, and business plans as well as setting the organisation's performance objectives, monitoring implementation and performance, and overseeing major capital expenditures, acquisitions, and divestitures;	APA Climate Transition Plan 2025 – "Governance" section APA Annual Report 2025 – "Climate Report – Climate-related governance" section APA Corporate Governance Statement 2025
			In describing the board's oversight of climate-related issues, organisations should consider including a discussion of the following: – how the board monitors and oversees progress against goals and targets for addressing climate-related issues.	APA Climate Transition Plan 2025 – "Governance" section APA Annual Report 2025 – "Climate Report – Climate-related governance" section APA Corporate Governance Statement 2025
	b. Describe management's role in assessing and managing climate-related risks and opportunities.	Guidance for all sectors	In describing management's role related to the assessment and management of climate related issues, organisations should consider including the following information: – whether the organisation has assigned climate-related responsibilities to management-level positions or committees; and, if so, whether such management positions or committees report to the board or a committee of the board and whether those responsibilities include assessing and/or managing climate-related issues;	APA Climate Transition Plan 2025 – "Governance" section APA Annual Report 2025 – "Climate Report – Climate-related governance" section APA Corporate Governance Statement 2025 APA Risk Management Policy 2025
			In describing management's role related to the assessment and management of climate related issues, organisations should consider including the following information: – a description of the associated organisational structure(s);	APA Climate Transition Plan 2025 – "Governance" section APA Annual Report 2025 – "Climate Report – Climate-related governance" section APA Corporate Governance Statement 2025
			In describing management's role related to the assessment and management of climate related issues, organisations should consider including the following information: – processes by which management is informed about climate-related issues;	APA Climate Transition Plan 2025 – "Governance" section APA Annual Report 2025 – "Climate Report – Climate-related governance" section APA Corporate Governance Statement 2025
			In describing management's role related to the assessment and management of climate related issues, organisations should consider including the following information: – how management (through specific positions and/or management committees) monitors climate-related issues.	APA Climate Transition Plan 2025 – "Governance" section APA Annual Report 2025 – "Climate Report – Climate-related governance" section

STRATEGY

Disclose the actual and potential impacts of climate-related risks and opportunities on the organisation's businesses, strategy, and financial planning where such information is material.

a. Describe the climate-related risks and opportunities the organisation has identified over the short, medium, and long term.	Guidance for all sectors	Organisations should provide the following information: – a description of what they consider to be the relevant short-, medium-, and long-term time horizons, taking into consideration the useful life of the organisation's assets or infrastructure and the fact that climate-related issues often manifest themselves over the medium and longer terms	APA Climate Transition Plan 2025 – below sections: Overview Climate-related risks and opportunities APA Annual Report 2025 – "Climate Report – Strategy" section
		Organisations should provide the following information: – a description of the specific climate-related issues potentially arising in each time horizon (short, medium, and long term) that could have a material financial impact on the organisation	APA Annual Report 2025 – "Climate Report – Strategy" section APA Climate Transition Plan 2025 – below sections: Overview Climate-related risks and opportunities
		Organisations should provide the following information: – a description of the process(es) used to determine which risks and opportunities could have a material financial impact on the organisation.	APA Climate Transition Plan 2025 – "Climate-related risks and opportunities" section. APA Annual Report 2025 – below sections: Climate Report – FY25 progress highlights Climate Report – Climate-related risk management
		Organisations should consider providing a description of their risks and opportunities by sector and/or geography, as appropriate.	APA Annual Report 2025 – "Climate Report – Strategy" section
b. Describe the impact of climate-related risks and opportunities on the organisation's businesses, strategy, and financial planning.	Guidance for all sectors	Organisations should consider including the impact on their businesses, strategy, and financial planning in the following areas: – Products and services – Supply chain and/or value chain – Adaptation and mitigation activities – Investment in research and development – Operations (including types of operations and location of facilities) – Acquisitions or divestments – Access to capital	APA Annual Report 2025 – "Climate Report – Strategy" section APA Climate Transition Plan 2025 – "Value Chain GHG Emissions" section
		Organisations should describe how climate-related issues serve as an input to their financial planning process, the time period(s) used, and how these risks and opportunities are prioritised. Organisations' disclosures should reflect a holistic picture of the interdependencies among the factors that affect their ability to create value over time.	APA Annual Report 2025 – below sections: Climate Report – Strategy Climate Report – Climate-related risk management
		Organisations should describe the impact of climate-related issues on their financial performance (e.g., revenues, costs) and financial position (e.g., assets, liabilities)	APA Annual Report 2025 – "Climate Report – Strategy" section APA Climate Transition Plan 2025–below sections: Overview APA's Strategy and Role in the Energy Transition Climate-related Risk and Opportunity Transition Plan Impacts and Dependencies Additional Information
		If climate-related scenarios were used to inform the organisation's strategy and financial planning, such scenarios should be described.	APA Annual Report 2025 – "Climate Report – Strategy" section APA Climate Transition Plan 2025 – "Climate-related risks and opportunities" section
		Organisations that have made GHG emissions reduction commitments, operate in jurisdictions that have made such commitments, or have agreed to meet investor expectations regarding GHG emissions reductions should describe their plans for transitioning to a low-carbon economy, which could include GHG emissions targets and specific activities intended to reduce GHG emissions in their operations and value chain or to otherwise support the transition.	APA Annual Report 2025 – below sections: Climate Report – FY25 progress highlights Climate Report – Strategy APA Climate Transition Plan 2025 – "Overview" section
c. Describe the resilience of the organisation's strategy, taking into consideration different climate-related scenarios, including a 2°C or lower scenario.	Guidance for all sectors	Organisations should describe how resilient their strategies are to climate-related risks and opportunities, taking into consideration a transition to a low-carbon economy consistent with a 2°C or lower scenario and, where relevant to the organisation, scenarios consistent with increased physical climate-related risks.	APA Climate Transition Plan 2025 – "Climate-related Risk and Opportunity" section APA Annual Report 2025 – "Climate Report – Strategy" section

Organisations should consider discussing: – where they believe their strategies may be affected by climate-related risks and opportunities	APA Annual Report 2025 – “Climate Report – Strategy” section
	APA Climate Transition Plan 2025 – “Climate-related Risk and Opportunity” section
Organisations should consider discussing: – how their strategies might change to address such potential risks and opportunities	APA Annual Report 2025 – “Climate Report – Strategy” section
	APA Climate Transition Plan 2025 – below sections: Climate-related Risk and Opportunity Transition Plan Impacts and Dependencies
Organisations should consider discussing: – the potential impact of climate-related issues on financial performance (e.g., revenues, costs) and financial position (e.g., assets, liabilities)	APA Annual Report 2025 – “Climate Report – Strategy” section
	APA Climate Transition Plan 2025 – “Climate-related Risk and Opportunity” section
Organisations should consider discussing: – the climate-related scenarios and associated time horizon(s) considered.	APA Annual Report 2025 – “Climate Report – Strategy” section
	APA Climate Transition Plan 2025 – “Climate-related Risk and Opportunity” section

RISK MANAGEMENT

Disclose how the organisation identifies, assesses, and manages climate-related risks.	a. Describe the organisation's processes for identifying and assessing climate-related risks	Guidance for all sectors	Organisations should describe their risk management processes for identifying and assessing climate-related risks. An important aspect of this description is how organisations determine the relative significance of climate-related risks in relation to other risks.	APA Climate Transition Plan 2025 – “Climate-related Risk and Opportunity” section
				APA Annual Report 2025 – “Climate Report – Climate-related risk management” section
			Organisations should describe whether they consider existing and emerging regulatory requirements related to climate change (e.g., limits on emissions) as well as other relevant factors considered.	APA Climate Transition Plan 2025 – “Climate-related Risk and Opportunity” section
	b. Describe the organisation's processes for managing climate-related risks.	Guidance for all sectors	Organisations should also consider disclosing the following: – processes for assessing the potential size and scope of identified climate-related risks – definitions of risk terminology used or references to existing risk classification frameworks used.	APA Annual Report 2025 – “Climate Report – Strategy” section
				APA Climate Transition Plan 2025 – “Climate-related Risk and Opportunity” section
				APA Annual Report 2025 – “Climate Report – Climate-related risk management” section
			Organisations should describe their processes for managing climate-related risks, including how they make decisions to mitigate, transfer, accept, or control those risks.	APA Climate Transition Plan 2025 – “Climate-related Risk and Opportunity” section
				APA Annual Report 2025 – “Climate Report – Climate-related risk management” section
			In addition, organisations should describe their processes for prioritising climate-related risks, including how materiality determinations are made within their organisations. In describing their processes for managing climate-related risks, organisations should address the risks, as appropriate.	APA Climate Transition Plan 2025 – “Climate-related Risk and Opportunity” section
	c. Describe how processes for identifying, assessing, and managing climate-related risks are integrated into the organisation's overall risk management.	Guidance for all sectors		APA Annual Report 2025 – “Climate Report – Climate-related risk management” section
			Organisations should describe how their processes for identifying, assessing, and managing climate-related risks are integrated into their overall risk management.	APA Climate Transition Plan 2025 – “Climate-related Risk and Opportunity” section
				APA Annual Report 2025 – “Climate Report – Climate-related risk management” section

METRICS & TARGETS

Disclose the metrics and targets used to assess and manage relevant climate-related risks and opportunities where such information is material.

a. Disclose the metrics used by the organisation to assess climate-related risks and opportunities in line with its strategy and risk management process.	Guidance for all sectors	Organisations should provide the key metrics used to measure and manage climate related risks and opportunities, as well as metrics consistent with the cross-industry, climate-related metric categories.	APA FY25 Sustainability Data Book – “Energy” & “GHG emissions” APA Climate Transition Plan 2025 – “Additional Information” section APA Annual Report 2025 – “Climate Report – Metrics and Targets” section
		Organisations should consider including metrics on climate-related risks associated with water, energy, land use, and waste management where relevant and applicable.	APA FY25 Sustainability Data Book – “Energy” APA Climate Transition Plan 2025 – “Additional Information” section
		Where climate-related issues are material, organisations should consider describing whether and how related performance metrics are incorporated into remuneration policies.	APA Annual Report 2025 – “Climate Report – Climate-related governance” section APA Climate Transition Plan 2025 – below sections: Overview APA’s Strategy and Role in the Energy Transition Governance Additional Information
		Where relevant, organisations should provide their internal carbon prices as well as climate-related opportunity metrics such as revenue from products and services designed for a low-carbon economy. Metrics should be provided for historical periods to allow for trend analysis.	APA Annual Report 2025 – “Climate Report – Strategy” section APA Climate Transition Plan 2025 – below sections: APA’s Strategy and Role in the Energy Transition Transition Plan Impacts and Dependencies Additional Information Climate-related risks and opportunities
		Where appropriate, organisations should consider providing forward-looking metrics for the cross-industry, climate-related metric categories, consistent with their business or strategic planning time horizons.	APA Annual Report 2025 – below sections: Climate Report – Strategy Climate Report – Metrics and Targets APA Climate Transition Plan 2025 – “Additional Information” section
		In addition, where not apparent, organisations should provide a description of the methodologies used to calculate or estimate climate-related metrics.	APA FY25 Greenhouse Gas Emissions and Energy Calculation Methodology
b. Disclose Scope 1, Scope 2 and, if appropriate, Scope 3 greenhouse gas (GHG) emissions and the related risks.	Guidance for all sectors	Organisations should provide their Scope 1 and Scope 2 GHG emissions independent of a materiality assessment, and, if appropriate, Scope 3 GHG emissions and the related risks. All organisations should consider disclosing Scope 3 GHG emissions.	APA FY25 Sustainability Data Book – “GHG emissions” APA Climate Transition Plan 2025 – below sections: Overview Operational Greenhouse Gas Emissions Value Chain GHG Emissions APA Annual Report 2025 – “Climate Report – Metrics and Targets” section
		GHG emissions should be calculated in line with the GHG Protocol methodology to allow for aggregation and comparability across organisations and jurisdictions. As appropriate, organisations should consider providing related, generally accepted industry-specific GHG efficiency ratios.	APA FY25 Sustainability Data Book, tab ‘GHG emissions’ APA FY25 Greenhouse Gas Emissions and Energy Calculation Methodology APA Climate Transition Plan 2025 – “Value Chain GHG Emissions” section
		GHG emissions and associated metrics should be provided for historical periods to allow for trend analysis. In addition, where not apparent, organisations should provide a description of the methodologies used to calculate or estimate the metrics	APA FY25 Sustainability Data Book, tab ‘GHG emissions’ APA FY25 Greenhouse Gas Emissions and Energy Calculation Methodology APA Climate Transition Plan 2025 – “Overview” section

c. Describe the targets used by the organisation to manage climate-related risks and opportunities and performance against targets.	Guidance for all sectors	Organisations should describe their key climate-related targets such as those related to GHG emissions, water usage, energy usage, etc., in line with the cross-industry, climate related metric categories in Table A2.1 (p. 79), where relevant, and in line with anticipated regulatory requirements or market constraints or other goals. Other goals may include efficiency or financial goals, financial loss tolerances, avoided GHG emissions through the entire product life cycle, or net revenue goals for products and services designed for a low-carbon economy.	APA Annual Report 2025 – below sections: Climate Report – FY25 progress highlights Climate Report – Strategy APA FY25 Sustainability Data Book, tab 'GHG emissions' APA Climate Transition Plan 2025 – below sections: Overview APA's strategy and role in the energy transition Operational greenhouse gas emissions Value chain GHG Emissions
		In describing their targets, organisations should consider including the following: – whether the target is absolute or intensity based; – time frames over which the target applies; – base year from which progress is measured; and – key performance indicators used to assess progress against targets.	APA Annual Report 2025 – below sections: Climate Report – FY25 progress highlights Climate Report – Strategy APA Climate Transition Plan 2025 – below sections Overview" section APA's strategy and role in the energy transition
		Organisations disclosing medium-term or long-term targets should also disclose associated interim targets in aggregate or by business line, where available.	APA Annual Report 2025 – below sections: Climate Report – FY25 progress highlights Climate Report – Strategy APA Climate Transition Plan 2025 – "Overview" section
		Where not apparent, organisations should provide a description of the methodologies used to calculate targets and measures.	APA FY25 Greenhouse Gas Emissions and Energy Calculation Methodology APA Climate Transition Plan 2025 – "Value Chain GHG Emissions"

TCFD Supplemental Guidance for Non-Financial Groups – Energy

TCFD recommended disclosure		TCFD disclosure guidance for certain sectors		APA response / reference
STRATEGY				
Disclose the actual and potential impacts of climate-related risks and opportunities on the organisation's businesses, strategy, and financial planning where such information is material.	Recommended disclosure (b) Describe the impact of climate-related risks and opportunities on the organisation's businesses, strategy, and financial planning.	Supplemental Guidance for Non-Financial Groups	Organisations should consider discussing how climate-related risks and opportunities are integrated into their (1) current decision-making and (2) strategy formulation, including planning assumptions and objectives around climate change mitigation, adaptation, or opportunities such as: – Research and development (R&D) and adoption of new technology. – Existing and committed future activities such as investments, restructuring, write-downs, or impairment of assets. – Critical planning assumptions around legacy assets, for example, strategies to lower carbon-, energy-, and/or water-intensive operations. – How GHG emissions, energy, and water and other physical risk exposures, if applicable, are considered in capital planning and allocation; this could include a discussion of major acquisitions and divestments, joint-ventures, and investments in technology, innovation, and new business areas in light of changing climate related risks and opportunities. – The organisation's flexibility in positioning/repositioning capital to address emerging climate-related risks and opportunities	APA Annual Report 2025 - below sections: Climate Report - FY25 progress highlights Climate Report - Strategy APA Climate Transition Plan 2025 - APA's Strategy and Role in the Energy Transition" section
METRICS AND TARGETS				
Disclose the metrics and targets used to assess and manage relevant climate-related risks and opportunities where such information is material.	Recommended disclosure (a) Disclose the metrics used by the organisation to assess climate related risks and opportunities in line with its strategy and risk management process.	Supplemental Guidance for Non-Financial Groups	For all relevant metrics, organisations should consider providing historical trends and forward-looking projections (by relevant country and/or jurisdiction, business line, or asset type). Organisations should also consider disclosing metrics that support their scenario analysis and strategic planning process and that are used to monitor the organisation's business environment from a strategic and risk management perspective.	APA FY25 Sustainability Data Book - Climate('Energy' and GHG emissions), Infrastructure & Business Intelligence, "Environment" APA Annual Report 2025 - below sections: Climate Report - Metrics and targets Climate Report - Climate-related risk management APA Climate Transition Plan 2025 - "Additional Information" section

Organisations should consider providing key metrics related to GHG emissions, energy, water and other physical risk exposures, land use, and, if relevant, investments in climate adaptation and mitigation that address potential financial aspects of shifting demand, expenditures, asset valuation, and cost of financing.

APA FY25 Sustainability Data Book – Climate (Energy and GHG emissions), Infrastructure & Business Intelligence, “Environment”

¹ Health & Safety Incidents, Employee Hours and Contractor Hours associated with Pilbara Energy have been excluded from the FY24 results due to a delay in the integration of Incident reporting processes.

² Employee Hour estimates do not exclude employees that are on leave, including Long Service Leave.

³ Contractor and field-based Contingent Worker Hours were calculated based on best-case estimates using available data sets at the time of reporting and may have required a degree of judgement by our Health and Safety Advisors.

⁴ Following a comprehensive review and analysis of our digital systems and data validation processes, APA has determined the data associated with our Casual and Contingent Workers is sufficiently reliable for inclusion into the FY24 Employee and Contractor Hour calculations. The review identified the addition of 100,966 hours to the FY24 Employee Hours total associated with Casual Workers, and the addition of 600,899 hours to the FY24 Contractor Hours total associated with Contingent Workers. This results in a reduction to the FY24 Health & Safety Near Miss Frequency Rate of 7% (from 18.9 to 17.6), the TRIFR result of 8% (from 2.4 to 2.2) and negligible reduction to the FY24 LTIFR result.

Process safety incidents									
Total Tier 1 incidents ¹			count	27	14	3	1	1	1
Total Tier 2 incidents ²			count	113	43	4	1	2	2
Grand total process safety incidents³			count	140	57	7	2	3	3

¹ Tier 1 incident defined as a major release of harmful substances that may cause a major accident such as natural gas. Release quantities is >500kg per hour.

² Tier 2 incident is defined as a significant release of harmful substances that may cause a major accident such as natural gas. Release quantities is >50kg per hour but less than Tier 1 quantities.

³ Following investment of capability to lift reporting and classification, the number of Networks process safety incidents recorded has seen a significant increase rather than the degradation of safety controls

¹ Installed Power Generation Capacities are the official name plate generation capacities (as built) for power generation assets.

² For the purposes of emissions and energy reporting, APA does not have operational control of X41, Gruyere Power Station, Gruyere Solar Farm and North Brown Hill Wind Farm.

³ The FY22 gas generation capacity for the Gruyere Power Station has been restated in FY23 due to the installation of a new engine in FY22 as part of staged expansion, omitted in previous year's reporting.

⁴ Total electricity transmission for FY23 includes Basslink interconnector.

⁵ Currently not operational and under care and maintenance

⁶ Used as emergency backup power supply only

⁷ Installed Battery Capacities are the beginning of life (BOL) rated capacities.

⁸ Additional assets and power generation capacity included in FY24 due to the acquisition of Alinta Energy's Pilbara assets

⁹ Final commissioning stage

Asset Integrity

Power generation infrastructure assets mercury (Hg)		IF-EU-120a.1 & EM-MD-120a.1	kg	0.0	0.0	0.0	1.9	2.0
Total Mercury (Hg) emissions		IF-EU-120a.1 & EM-MD-120a.1	kg	0	0	0	2	2

¹ Emissions, substance, source and location data is accounted and reported in line with the National Environment Protection (National Pollutant Inventory) Measure. The emission factors used in APA's NPI reports are sourced from relevant industry emission estimation technique manuals available on the NPI website.
APA's FY25 NPI submission is currently being prepared and will be lodged with the Regulator by 30 September 2025. Unless required to be displayed as a decimal, numbers and percentages have been rounded to the nearest whole number.
² Reporting air emissions is currently 1 year in arrears

Compliance

Year-end 30 June	GRI	SASB	UoM	FY25	FY24	FY23	FY22	FY21	FY20
Environment incidents									
Total environmental regulatory notifiable incidents		EM-MD-540a.1	count	9	21	18	4	9	4
Reportable water incidents ¹	303-4	IF-EU-140a.2	count	1	3	3	0	2	0
Reportable spill incidents		EM-MD-160a.4 & RR-ST-150a.2	count	4	4	1	0	3	0

¹ No impact to water. 100L grout spill was released to a dry creek bed and remediated immediately.

Water Withdrawal

Year-end 30 June	GRI	SASB	UoM	FY25	FY24	FY23	FY22	FY21
Water withdrawn - midstream facilities ¹	303-3	IF EU 140a.1 (1)	kL	7,576	NA	NA	NA	NA
Water withdrawn - power stations ²	303-3	IF EU 140a.1 (1)	kL	1,943,776	NA	NA	NA	NA

¹ Only limited gas compressor stations have been included in FY25 reporting using a mixture of onsite estimates and actual available data. Further assessment planned to determine materiality of water impacts across APA's gas transmission network. Data not available for FY25 reporting for Kogan North Processing facility - therefore excluded from this report. Further assessment planned to determine materiality of water impacts at this site.

² Data reported excludes X41 Power Station as not under APA's operational control. Data reported excludes Gruyere Power Station as water supplied and reported by 3rd party minesite. Data reported excludes Daandine Power Station as this asset is not currently operating and involves only non-material water usage for site amenities.

End-user GHG emissions

Year-end 30 June	SASB	GRI	UoM	FY25	FY24	FY23	FY22	FY21	FY20
End-user emissions (upstream and downstream)		305-3	t CO ₂ -e	62,775,374	64,035,270	62,329,409	66,834,654	66,286,223	68,286,483

⁷ All calculations are based on Scope 2 market method, except when indicated otherwise.

⁸ A true-up occurs where there is any variance between the pre-assured actuals on which the unit amount is calculated, and assured actuals disclosed.

³ Where there has been no voluntary surrender of LGCs, there will be minor differences in the Scope 2 emissions value calculated between the location-based and market-based methods. This is in part is due to the residual mix factor being applied at a national level rather than on a state-by-state basis. Where this is the case i.e., there has been no voluntary surrender of LGCs, we assume the location-based method calculation value also represents the market-based method calculation value. APA has not surrendered LGCs for electricity transmission line losses in the reporting period.

⁴ Emissions for Basslink in FY23 have been applied to FY22 and FY21 as actuals are not available for both years.

⁵ Required to be surrendered by liable entities under the LRET according to the renewable power percentage.

⁶ These values are not adjusted due to re-baselining activity and use the Global Warming Potentials (GWP) from the Intergovernmental Panel on Climate Change Assessment Report 5 based on a 100-year timeframe.

⁷ To determine Scope 2 emissions using the market method, LGCs are only allocated to facilities under APA's operational control.

⁸ Work from home emissions are included in Category 7: Employee commuting for FY24

⁹ Net zero goal or equivalent (e.g. carbon neutral goal) covering operational emissions

Units Surrendered for FY25

Legend: VCU = Verified Carbon Unit; ACCU = Australian Carbon Credit Unit; KACCU = Kyoto Australian Carbon Credit Unit; REDD+ = Reducing emissions from deforestation and forest degradation in developing countries; HIR = Human-Induced Regeneration; IFM = Integrated Farm Management
